Unmanned Aircraft Systems (UAS) owned, operated, and controlled by the Federal Government; to secure the integrity of American infrastructure, including America's National Airspace System (NAS); to protect our law enforcement and warfighters; and to maintain and expand our domestic industrial base capabilities. Accordingly, I hereby order:

By the authority vested in me as President by the Constitution and the laws of the

United States of America, I, DONALD J. TRUMP, President of the United States of

America, find that additional actions are necessary to ensure the security of

security. United States Government operations involving UAS require accessing, collecting, and maintaining data, which could reveal sensitive information. The use of UAS and critical components manufactured and developed by foreign adversaries, or by persons under their control, may allow this sensitive information to be accessed by or transferred to foreign adversaries. Furthermore, the manufacturing

of UAS involves combining several critical components, including advanced

manufacturing techniques, artificial intelligence, microelectronic components,

and multi-spectral sensors. The Nation's capability to produce UAS and certain critical UAS components domestically is critical for national defense and the security and strength of our defense industrial base. It is the policy of the United States, therefore, to prevent the use of taxpayer dollars to procure UAS that present unacceptable risks and are manufactured by, or contain software or critical electronic components from, foreign adversaries, and to encourage the use of domestically produced UAS. agencies (agencies) shall review their respective authorities to determine

(iv) otherwise providing Federal funding for the procurement of a covered UAS.

(b) After conducting the review described in subsection (a) of this section, the

heads of all agencies shall each submit a report to the Director of the Office of

Management and Budget identifying any authority to take the actions outlined in

Sec. 3. Reviewing Federal Government Use of UAS. (a) Within 60 days of the date of

this order, the heads of all agencies shall each submit a report to the Director of

National Intelligence and the Director of the Office of Science and Technology Policy describing the manufacturer, model, and any relevant security protocols for all UAS currently owned or operated by their respective agency, or controlled by their agency through a third party, such as a contractor, that are manufactured by

foreign adversaries or have significant components that are manufactured by

in consultation with the Secretary of Defense, the Attorney General, the Secretary of Homeland Security, the Director of the Office of Science and Technology Policy, and the heads of other agencies, as appropriate, shall review the reports required by subsection (a) of this section and submit a report to the President assessing the security risks posed by the existing Federal UAS fleet and outlining potential steps that could be taken to mitigate these risks, including, if warranted,

discontinuing all Federal use of covered UAS and the expeditious removal of UAS

(b) The Director of the Office of Management and Budget shall work with the

heads of all agencies to identify possible sources of funding to replace covered

UAS in the Federal fleet in future submissions of the President's Budget request.

Sec. 6. Definitions. For purposes of this order, the following definitions shall apply:

(a) The term "adversary country" means the Democratic People's Republic of

Korea, the Islamic Republic of Iran, the People's Republic of China, the Russian

Federation, or, as determined by the Secretary of Commerce, any other foreign nation, foreign area, or foreign non-government entity engaging in long-term patterns or serious instances of conduct significantly adverse to the national or

economic security of the United States.

entity domiciled in an adversary country;

country.

(b) The term "covered UAS" means any UAS that:

(i) is manufactured, in whole or in part, by an entity domiciled in an adversary country; (ii) uses critical electronic components installed in flight controllers, ground control system processors, radios, digital transmission devices, cameras, or

(iii) uses operating software (including cell phone or tablet applications, but not

(iv) uses network connectivity or data storage located outside the United States,

cell phone or tablet operating systems) developed, in whole or in part, by an

or administered by any entity domiciled in an adversary country; or

(v) contains hardware and software components used for transmitting photographs, videos, location information, flight paths, or any other data collected by the UAS manufactured by an entity domiciled in an adversary

(c) The term "critical electronic component" means any electronic device that

component does not include, for example, passive electronics such as resistors,

stores, manipulates, or transfers digital data. The term critical electronic

and non-data transmitting motors, batteries, and wiring.

otherwise affect:

corporation, government, group, subgroup, other organization, or person. (e) The term "Intelligence Community" has the same meaning set forth for that term in section 3003(4) of title 50, United States Code.

(f) The term "National Airspace System" (NAS) means the common network of

or landing areas; aeronautical charts, information, and services; related rules,

United States airspace; air navigation facilities, equipment, and services; airports

regulations, and procedures; technical information; and manpower and material.

The term also includes system components shared jointly by the Departments of

(g) The term "Unmanned Aircraft Systems" (UAS) means any unmanned aircraft,

(d) The term "entity" means a partnership, association, trust, joint venture,

and the associated elements that are required for the pilot or system operator to operate safely and efficiently in the NAS, including communication links, the components that control the unmanned aircraft, and all critical electronic components. The term UAS does not include any separate communication device, such as a cellular phone or tablet, designed to perform independently of a UAS system, which may be incorporated into the operation of a UAS. Sec. 7. General Provisions. (a) Nothing in this order shall be construed to impair or
